To all waterfront personnel:

These items may frequently be sighted in the vicinity of a vessel being attended by one of our surveyors. Due to increased awareness as a result of heightened port security, these items could possibly be mistaken as suspicious in nature. Please regard this correspondence as public domain and feel free to distribute as you deem necessary. Do not hesitate to contact my office if additional information is required.

W. Charles Leeuwenburg, II  
President

## DRAFT SURVEY TOOLS

**Arrows indicating individual items:**

**Blue – Fifty (50) foot nylon line tether spliced to sample catcher.**

**Yellow – Stainless steel sample catcher used to collect seawater.**

**Red – Glass hydrometer used to measure seawater salinity / density**

**Green – Protective case for hydrometer constructed of PVC pipe.**

***Note: Ruler included in photo for size reference***
